Peter Thomas Roth - Wrinkler Preventer

Product ID: 27154

Patent pending formula helps prevent the appearance of environmental wrinkles. Collagen and elastin are the building blocks for healthy, youthful looking skin. MMPs break down these elements leading to wrinkles and loss of elasticity. Colhibin, a plant derived peptide, helps inhibit MMPs and helps protect skin from the appearance of accelerated environmental based early skin aging. Aldenine, a free radical scavenger, combines soy, wheat and tripeptide-1 to help maintain the appearance of strong collagen fibers, particularly Collagen III (most abundant in young skin). Pepha-Protect helps protect the appearance of important cell structures from environmental damage, by utilizing the natural defense system found in the desert watermelon. Preregen, a soy protein, helps combat and reduce the appearance of the loss of elastin due to the harmful effects of environmental aggressors such as ozone, smog and pollution.

All Sales Final - No Returns or Exchanges.

Retail Price: \$75.00
